Objective

Motivated Electrical and Electronics Engineering student with hands-on experience in Machine Learning, Deep Learning, Computer Vision, Python, and mobile application development. Skilled in building and deploying end-to-end AI/ML systems with measurable impact. Seeking a full-time Software Engineer or AI/ML Engineer role to deliver intelligent, data-driven solutions.

Area of Interest

- Artificial Intelligence and Machine Learning
- Computer Vision and Deep Learning
- Agri-tech and Smart Agriculture Platforms
- Mobile Application and Backend Development

Education

B.E. – Electrical and Electronics Engineering — CGPA: 8.013
Dr. Mahalingam College of Engineering and Technology, Coimbatore

HSC – Muthusamy Gounder Matriculation Higher Secondary School — June 2023 | 76.16%

SSLC – Muthusamy Gounder Matriculation Higher Secondary School — June 2021 | Pass

Skills

Technical Skills

Programming Languages: Python, C, Java, Dart
AI and ML: Machine Learning, Deep Learning, Neural Networks, Image Classification, Computer Vision, Object Detection, Transfer Learning, OpenCV, TensorFlow, Keras, scikit-learn
Data Analytics: Pandas, NumPy, Matplotlib, Statistical Analysis, Microsoft Excel
Mobile and Backend: Flutter, Android Studio, Flask, REST APIs, SQLite
Tools: VS Code, Git, GitHub, Jupyter Notebook

Soft Skills

- Problem-Solving and Analytical Thinking
- Teamwork and Collaboration
- Strong Communication Skills
- Quick Learner and Self-Motivated
- Time Management

Projects

AI-Based Smart Classroom Attendance System

- Built end-to-end AI attendance system using Python, OpenCV, and LBPH face recognition with 2-of-3 frame verification, achieving over 95% recognition accuracy and reducing recording time by 90%; integrated Flask dashboard with SQLite for 100+ student records.

Crop Disease Detection – Smart Crop Platform

- Developed ML-powered agriculture platform using TensorFlow and Keras image classification to detect 5+ crop diseases with over 90% accuracy, with real-time recommendations deployed via a Flutter mobile interface.

Quality Control AI – Automated Defect Detection

- Built Python and OpenCV computer vision system for automated manufacturing defect detection, reducing manual inspection time by approximately 70% and improving production accuracy.

Smart Ration Distribution – Mobile App and Embedded Backend

- Designed Flutter mobile application with user authentication and real-time stock tracking; developed Arduino-based embedded firmware for automated data acquisition and inventory management.

Staff Availability Tracker App

- Created real-time faculty availability tracking application using Flutter, enabling students to instantly locate available staff across college campuses.

Certifications and Achievements

- Participation Certificate – VCET HackElite, IEEE-Sponsored 24-Hour National Level Student Technical Hackathon
- Participation Certificate – Drone Lab Workshop
- Microsoft Excel Certification

Hobbies

Gardening | Exploring AI and Technology Trends

Extracurricular Activities

- Volunteer – National Service Scheme (NSS)
- Participated in IEEE-Sponsored 24-Hour National Level Hackathon (VCET HackElite), demonstrating teamwork, rapid prototyping, and problem-solving under time constraints.
